SUMMARY

Skilled software developer with experience in backend and front-end development using Java, Go, Next.js, PostgreSQL, and Spring Boot. Strong track record in leading projects, optimizing code, and building scalable systems. Passionate about creating user-friendly solutions.

WORK EXPERIENCE

SOFTWARE ENGINEER - Virtusa (SSE for WILEY Project) **JULY 2026 - PRESENT**

- Contributed to optimizing business workflows by developing Power Automate and RPA solutions to streamline processes and improve operational efficiency.

Software Engineer - Entgra.io **DEC 2025 - JULY 2026**

- Developed and maintained RESTful APIs and platform integrations within the WSO2 ecosystem, utilizing WSO2 API Manager and Carbon Console for API management and tenant administration.
- Investigated and resolved production issues through debugging, root cause analysis, and performance optimization to improve platform reliability.
- Collaborated in Agile development teams using Jira, GitHub, and GitHub Actions, contributing to code reviews and CI/CD automation.

Software Engineer Intern - Wiley Global Technologies **FEB 2025 - DEC 2025**

- Microservices & Cloud Technologies: Gained hands-on experience with Kubernetes, RabbitMQ, AWS S3, AWS RDS, AWS EC2, and Terraform, applying them to microservices-based architectures.
- Frontend Development: Worked with React (TypeScript) to handle global state management, authentication flows, and responsiveness for a scalable frontend.

Trainee Software Engineer - Coduza PVT(LTD) **Jan 2024 - JUNE 2024**

- Contributed to the development of a platform for the Cancer Victims Association Sri Lanka using Next.js and Node.js.

EDUCATION

Bsc In Information Technology Specialization in Software Engineering **JUNE 2022 - Present**
Sri Lanka Institute of Information Technology

- CGPA - 3.78 / WGPA - 3.81**
- Qualified for Dean's List in Seven Semesters
- Knowledge-sharing resource person at the Faculty of Computing Student Community

Maliydeva College **Feb 2008 - Feb 2021**
Physical Science(IT) - B B C

PROJECTS

- Project Switchgear/ADMS - Associated with Entgra**
 - Project Overview**
 - Contributed to a scalable Advanced Distribution Management System (ADMS) for real-time monitoring and remote control of electrical switchgears via the IEC 60870-5-104 protocol.

Key Contributions:

- Secured remote switchgear operations by implementing TOTP authentication for the critical "Double Command" (Select and Execute) execution flow.
- Developed advanced search functionality to efficiently locate specific ADMS device nodes, accelerating system navigation and issue resolution
- Supported AWS environment monitoring and proposed automated, zero-downtime deployment strategies to replace manual deployment workflows.

• NEXA Platform - Associated with Wiley

◦ Project Overview

- Worked on a product health monitoring platform that visualizes real-time status by aggregating data from Dynatrace, JSM, and Zabbix. The platform offers a unified view of incident trends and synthetic monitor status across multiple tenants.

Key Contributions:

- Developed a unified Problem Dashboard aggregating incidents from Zabbix and Dynatrace across all tenants, enhancing incident visibility and response.
- Keycloak–Azure AD integration to enable secure SSO, streamlining identity management.
- Refactored codebase to improve performance and reducing load times.
- Monitored and optimized JVM performance using VisualVM, identifying memory leaks, tuning heap allocations, and analyzing threads in both local and Dockerized environments.

PUBLICATIONS

- Synapse CI: Intelligent Test Prioritization & Chaos Engineering Framework | ICCTA 2026, Austria
Best of Session Presentation - ICCTA 2026

AWARDS

- **Top 10 Finalist of Mini Hackathon SLIIT**
- **SLIIT Scholarship Award for Exceptional Academic Performance** (2022-June, 2023-June, 2024-Jan, 2024-Jul, 2025-Jan, 2025-June, 2026-Jan)

SKILLS

- **General & Backend:** Java: Springboot, Go: Gin, Node.js:Express
- **Frontend:** React, Next JS, HTML, XAML,CSS,Tailwind CSS, Javascript
- **Database Related :** PostgreSQL, MongoDB, MS SQL, MYSQL, Redis
- **Cloud Technologies:** AWS beginner level experience
- **Other:** Microservices, Data Warehouse concepts, Linux, Agile technologies (Jira, Slack, GitHub), CI/CD pipeline, GitHub Actions, YML, AWS (EC2,EKS,S3,RDS,ELB), OAuth2,Keycloak

CERTIFICATIONS

- Java Spring Framework 6 with Spring Boot 3
- Docker for Java Developers
- Master Microservices with SpringBoot,Docker,Kubernetes
- Docker & Kubernetes: The Practical Guide [2025 Edition]
- Terraform with Labs

PERSONAL DEVELOPMENT

- Preparing for AWS Certified Solutions Architect – Associate
